SURV[®] Receives Software House[®] Enterprise Partner Certification

Wilmington, MA — November 26, 2007 — Surveillance Specialties, Ltd. (SURV[®]), a leading security systems integrator in New England, has recently achieved Software House's highest level of dealer certification.

The 2007 Software House[®] Enterprise Partner Certification is awarded to integrators who successfully complete the rigorous training and evaluation outlined in the Software House Dealer Certification Program. This intensive certification program has three levels: Authorized Dealer, Advanced Integrator, and Enterprise Partner. Integrators who achieve the Enterprise Partner level have displayed the highest level of training on Software House products as well as maintaining staff members who are Microsoft Certified System Engineers (MCSE), Cisco Certified Network Associates (CCNA) and Microsoft Certified Database Administrators (MCDBA).

"SURV is pleased to have achieved Enterprise Partner status and our ability to obtain this designation – given the training and number of field installations required - I believe, is evidentiary of our commitment to quality and to our customers," states Justin Davis, COO and Vice President of SURV.

"SURV is an extremely valuable partner to Software House," said Jim Kelly, vice president of America sales for Tyco's Access Control and Video Systems. "Only the top echelon of security integrators in the industry are awarded the Software House[®] Enterprise Partner Certification and it's a testament to SURV commitment to product knowledge and superior customer service that they've achieved this status."

About SURV

SURV is a leading systems integration firm that specializes in the design and implementation of security solutions that rely on the latest in access control, video, wireless communication, intercom, intrusion and perimeter detection technologies. As a full service provider, SURV offers a complete line of professional services that include: end-user training, in-field service, equipment repair and computer-aided design (CAD). SURV services all of New England and supports enterprise clients nationally through

National Security Integrators (NSI) – a consortium of firms that are spread across the country and support one another on geographically disparate projects. To be certain, we are very proud of our client list, many of whom can be found on the Fortune 500 and Fortune 1000 respectively.

SURV is privately-owned, Massachusetts based company and has been listed among the Boston Business Journal's Top 50 fastest growing privately held companies.

For further information on SURV's integration capabilities and patent-pending raXess™ design-technology, visit us on the web at www.surv.com.

About Tyco International's Software House® access control and security management technologies

Tyco International's Software House technologies include the innovative C·CURE® 9000 security and event management system and the flagship C·CURE 800/8000 access control solution. Combined with a suite of powerful door controllers and the industry's first true multi-technology reader, Software House technologies are among the most powerful in the industry. Add an unsurpassed integration platform that allows customers to integrate seamlessly with critical business applications, including American Dynamics Intellex® digital video management systems, and it's easy to see why Software House solutions are the hands-down choice for security-critical applications. In fact, nearly half of the companies listed on the Fortune 500 use Software House branded solutions to help solve their most complex business operation challenges.
