SURV Awarded U.S. Patent No. 7,696,872 for raXess[®] design-technology

Wilmington, MA - July 16, 2010 - Surveillance Specialties, Ltd. (SURV[®]), a leading commercial security, door, frame and lock integrator in New England, today announced that its raXess[®] design technology was granted patent issuance by the U.S. Patent Office.

The raXess design-technology, which focuses on power management and wiring efficiency, allows for a lower total cost of ownership (TCO) associated with the deployment of an access control system. The server-based raXess design eliminates the need for traditional wall mount panels and their inherent space constraints, by allowing access control controllers to slide into a 2-post telecomm rack, or a 4-post information technology (IT) rack. From a labor-savings perspective, the patented design drastically reduces installation and service time through pre-configured wiring, while easily removable wire connectors allow for quick field installation without compromising the enclosure's electronics. The raXess design has been tested and certified to meet the UL294 standard.

"The raXess design-technology represents years of research and working with our customers to meet their needs," states Chief Operating Officer, Justin Davis. "Our ability to license raXess to access control manufacturers (OEMs), combined with the issuance of the patent, certainly substantiates and validates the uniqueness and quality of the design."

About SURV

Focusing on commercial clients, SURV is a leading systems integration firm that specializes in integrating access control, CCTV/IP video, alarm, intercom and infant protection technologies with doors, frames and finish hardware into a comprehensive security solution. SURV offers a complete line of professional services including: installation, end-user training, in-field service, product repair, computer-aided design (CAD) and custom fabrication.

To be certain, we are very proud of our client list, many of whom can be found on the Fortune 500 and Fortune 1000 respectively.

Privately-owned, SURV has offices in Massachusetts and Maine and services all of New England (MA, ME, NH, CT and RI). SURV supports enterprise clients nationally through its founding-membership in the national organization - National Security Integrators (NSI).

For further information on SURV, or its patented raXess design-technology, visit us on the web at www.surv.com.
